

Designed for  
Small Business

## Top 10 Reasons Windows XP Professional Is Right for Small Business

- 1 Share computers and network Resources**

Connect multiple computers to the Internet through your PC and a single Internet connection.
- 2 Back up your important data files to help keep them safe**

Microsoft® Windows® XP back-up utility comes pre-installed with Windows XP Professional.
- 3 Satisfy your networking needs**

Easily integrate Windows XP Professional-based desktops and notebooks into Microsoft Windows Server™ environments.
- 4 Protect your PC from harmful attachments**

Attachment Manager helps to safeguard your computer from viruses.
- 5 Protect your important business documents and information**

Encrypting File System provides a high level of file protection from hackers and data theft.
- 6 Get more battery life out of your mobile PC**

Advanced Power Management extends battery life by managing the way your laptop uses power.
- 7 Reverse harmful system changes**

Reverse and "undo" any hardware driver or software changes, returning your PC to its previous working state.
- 8 Work from virtually anywhere**

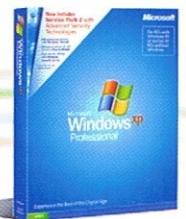

Configure wireless networks for the office or connect seamlessly to wireless "hot spots."
- 9 Protect your Internet-connected PC with firewall protection from startup to shutdown**

Windows Firewall with startup and shutdown support offers additional protection against viruses and hackers.
- 10 Stay more secure and up-to-date with automatic updates**

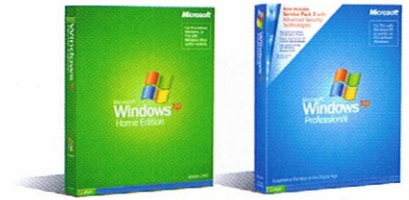

Download and install the latest security updates and Windows XP Professional improvements automatically.

start something productive
